

ENVIRONMENTAL & SUSTAINABILITY POLICY

Epol acknowledges its responsibility and obligation towards the environment and is dedicated to implementing best practices to ultimately protect our environment and achieve a sustainable future.

To achieve this, we commit to:

- Complying with the applicable environmental legislation
- Maintaining a robust and reliable environmental management system
- Complying with Rainbow's sustainability model: "Make more by using less"
- Constantly working towards reducing energy, water, feed and other waste footprints by setting, monitoring, and revising targets and objectives on an annual basis.
- Preventing noise, dust, water, soil and other pollution and the use of environmentally unfriendly substances to reduce degradation because of the organisation's activities
- Identifying and addressing risks, opportunities, and innovations across our operations to recycle, conserve biodiversity and reduce our carbon footprint
- Producing feed that is the correct nutritional balance for sustainable production and food security
- Responsibly and efficiently utilising and managing materials and resources throughout our operations, particularly those which are non-renewable
- Raising awareness of shared responsibilities and accountability amongst employees, contractors, local communities, and other stakeholders on environmental matters
- Continually improving by analysing performance and the fulfilment of our obligations and subsequently implementing improvement solutions
- Aligning with national and international developments, technologies, and scientific knowledge
