

MEGA DRY COW 15

CLASS: Dry Cow Feed + Anionic Salts

REG. NO. ACT 36/1947: V31132

Perfectly balanced steam up concentrate with 15% protein. Fed to prevent hypocalcemia, ensure healthy foetal growth and prepare the rumen for optimal digestion post calving. Supplement for late pregnant dairy cows on pastures.

COMPOSITION

NUTRIENT	MIN/MAX	QUANTITY	UNIT
Protein	Min	150	g/kg
Moisture	Max	120	g/kg
Fibre	Max	120	g/kg
Fat	Min/Max	25/85	g/kg
Calcium	Min/Max	36/40	g/kg
Phosphorus	Min	4.5	g/kg

INGREDIENT STATEMENT:

This animal feed contains: Grain and grain by-products, animal protein products, plant protein products, roughages and agro-industrial by-products, sugar cane by-products, oils and fats, amino acids, vitamins and minerals, antioxidants, binders, acidity regulators, flavouring agents, aroma enhancing agents, compounds of trace elements, digestibility enhancers and gut flora stabilizers. This product contains genetically modified ingredients.

NOTE:

This farm feed is available with or without registered stock remedies. See bag tag for details and feed strictly according to given instructions below.

FEEDING RECOMMENDATIONS:

Feed a daily ration of 4-5 kg/cow to dry cows grazing on cultivated pastures containing relatively high concentrations of soluble protein and potassium, for 4-6 weeks before calving. The quantity to feed can be adjusted up or down, depending on frame size of cows, and achievement of breed specific urine pH target ranges. Consult an animal nutritionist for more detailed/customized advice

For more detailed feeding recommendations contact an Epol Technical Advisor.
